

THDR

—  
THDR Group  
January 2026

**For over 200 years, fashion has been an unchanged industry,  
utilizing a mass production ready-to-wear model.**

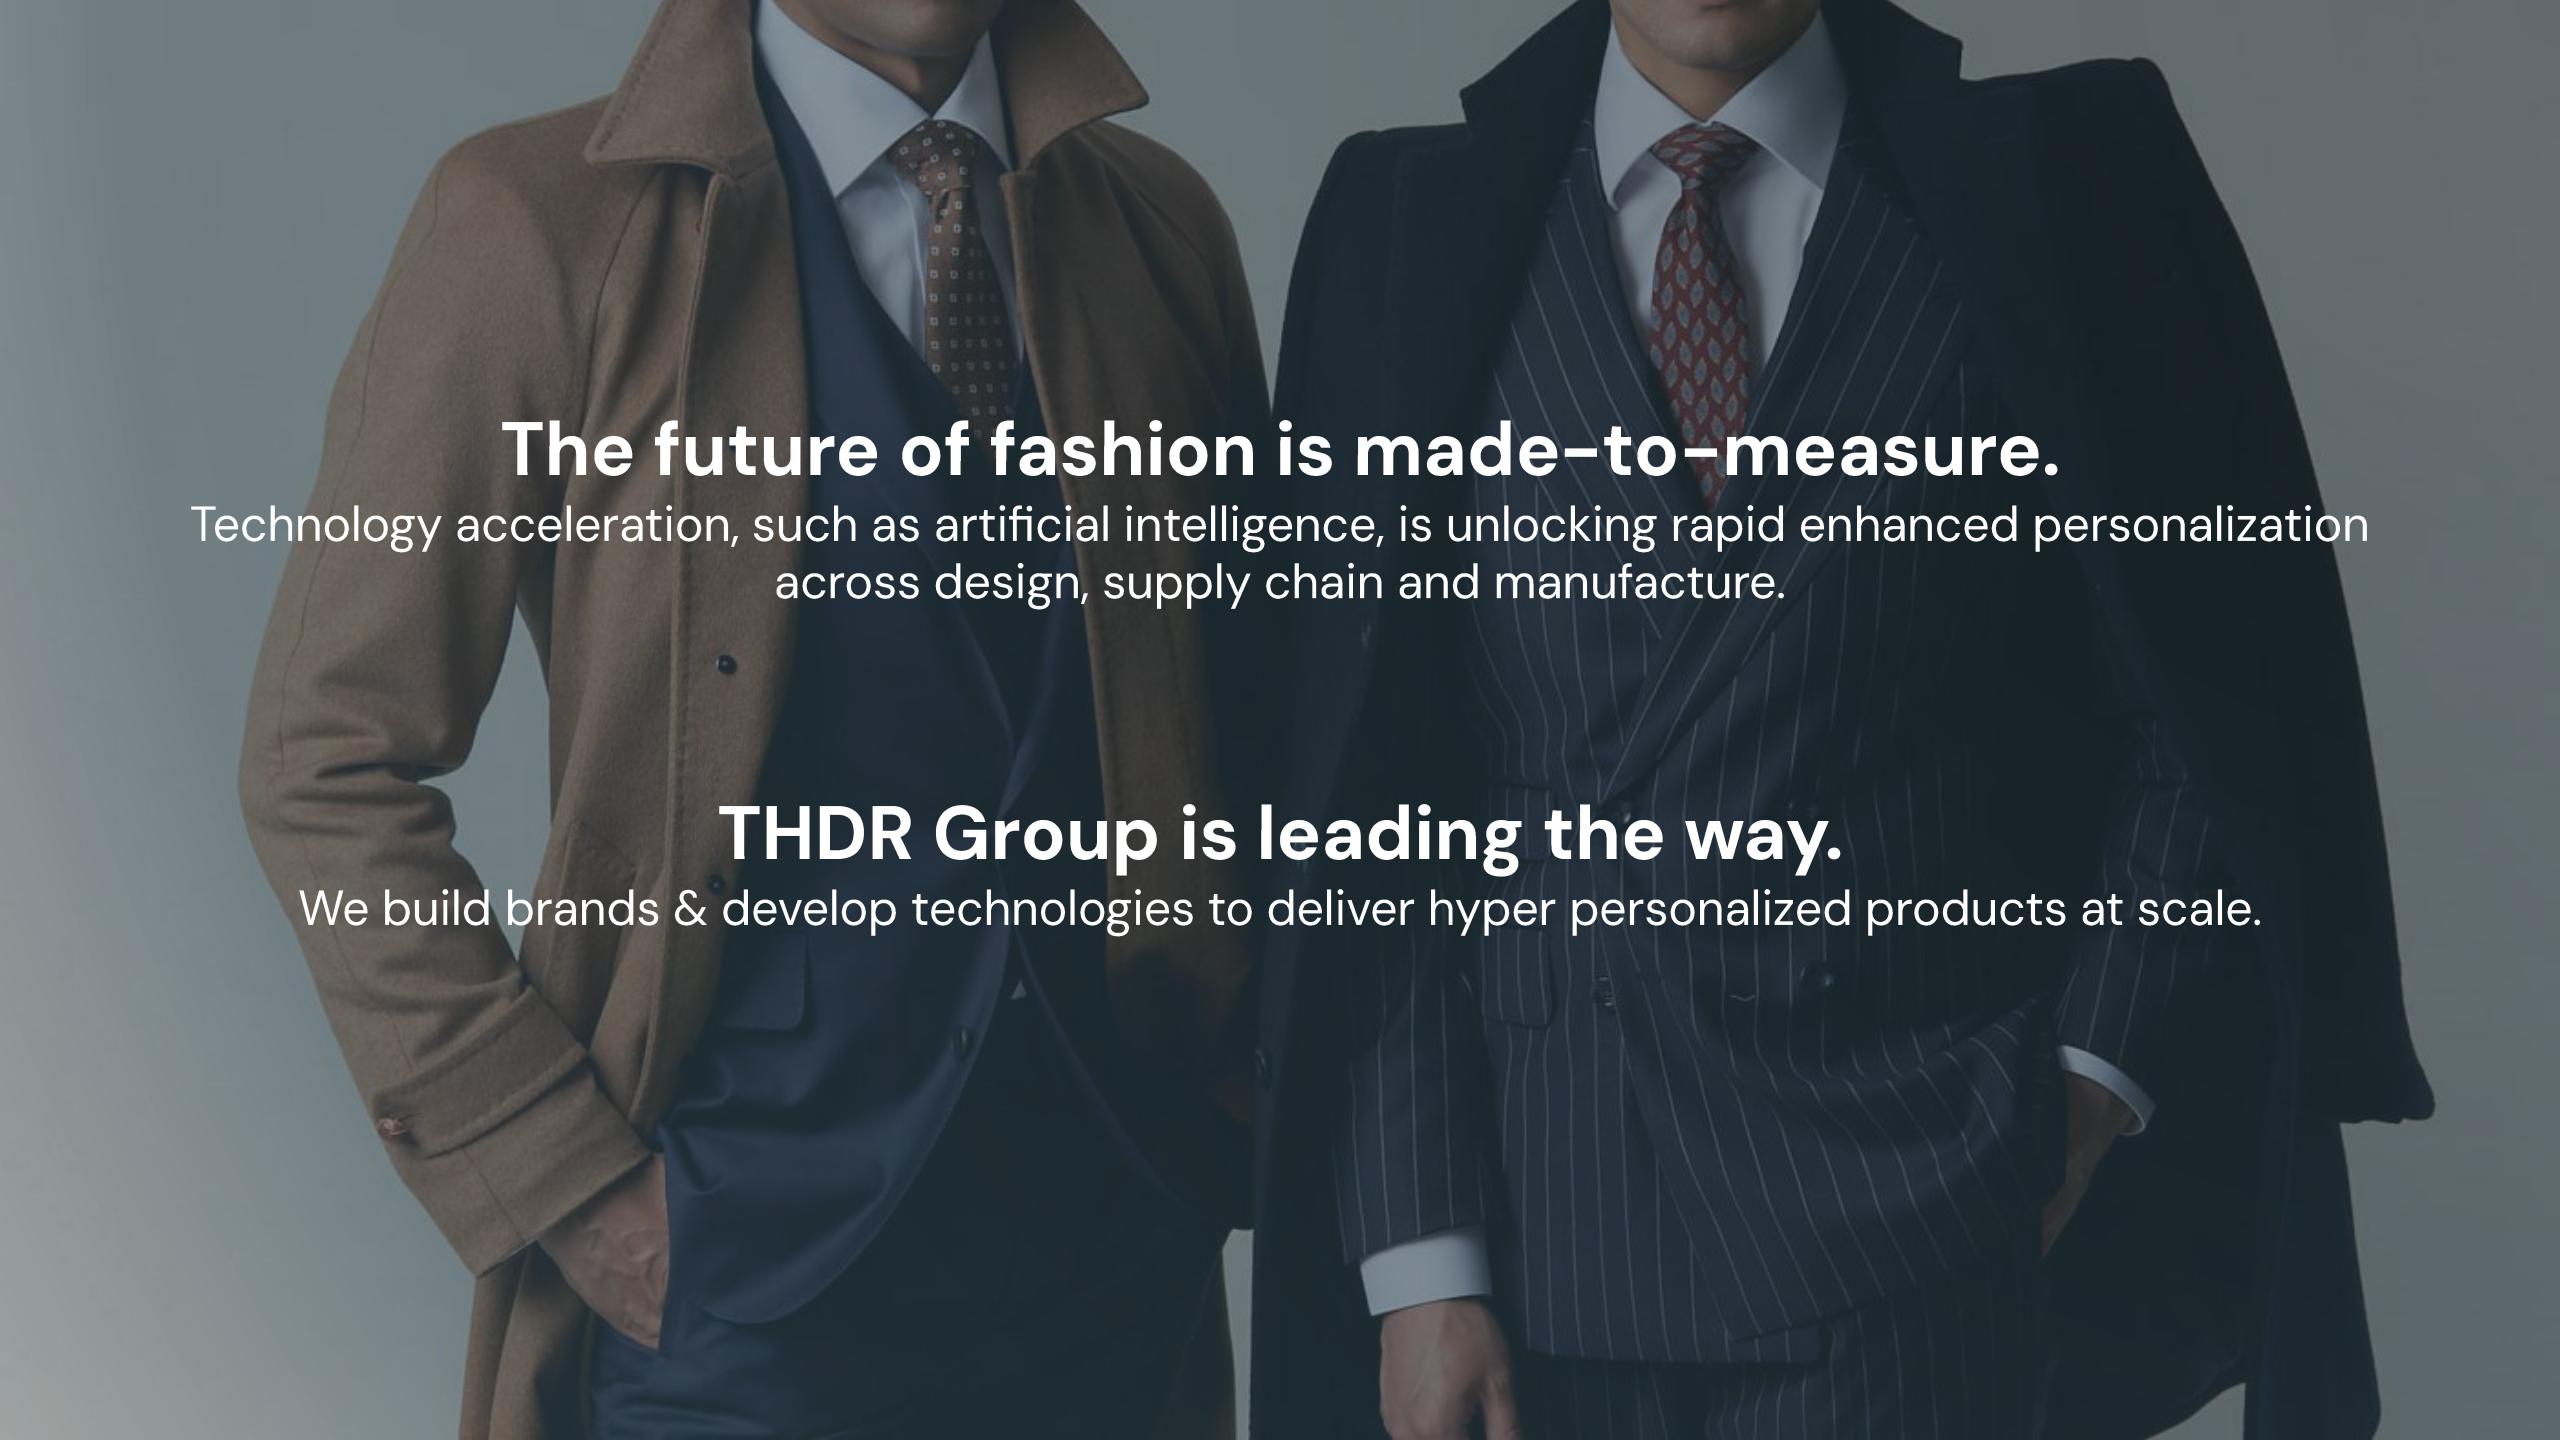

**Consumer Frustration Standard  
Sizing**

**Deadstock & Sustainability  
Concerns**

**Expressing Personal Style**

**The future of fashion is made-to-measure.**

Technology acceleration, such as artificial intelligence, is unlocking rapid enhanced personalization across design, supply chain and manufacture.

**THDR Group is leading the way.**

We build brands & develop technologies to deliver hyper personalized products at scale.

# Investment Overview

## Meet the future of fashion technology

THDR Group is seeking to expand its brands offering and technology capabilities to capitalize on the opportunity presented in the fashion industry.

Generative AI  
Fashion Design

Founded in  
February 2021

HQ in Sydney, Australia

15 staff

Raising \$5M USD

# Pocket Tailor

## Consistently accurate measurements at scale

The Pocket Tailor is a multi-model AI system that creates highly accurate garment measurements based on the user's photos & details.

<60 second experience

30k+ App Installs

97.5% Accuracy

# WaveWear

---

## Frictionless access to digital experiences on every garment

Bridging the physical garment with the digital experience, our NFC powered smart garment labels let customer tap and immediately surface unique information.

**Ownership & Authenticity:** powering rental & resale marketplaces, digital twin & blockchain applications

**Consumer Support:** warranty claims, repairs & alterations tracking, promotional targeting

**Accessible Garment Information:** origins & manufacturing, care instructions, responsible disposal steps

**Supply Chain Logistics:** end-to-end tracking for manufacturing, shipping, fulfillment, and retail environments

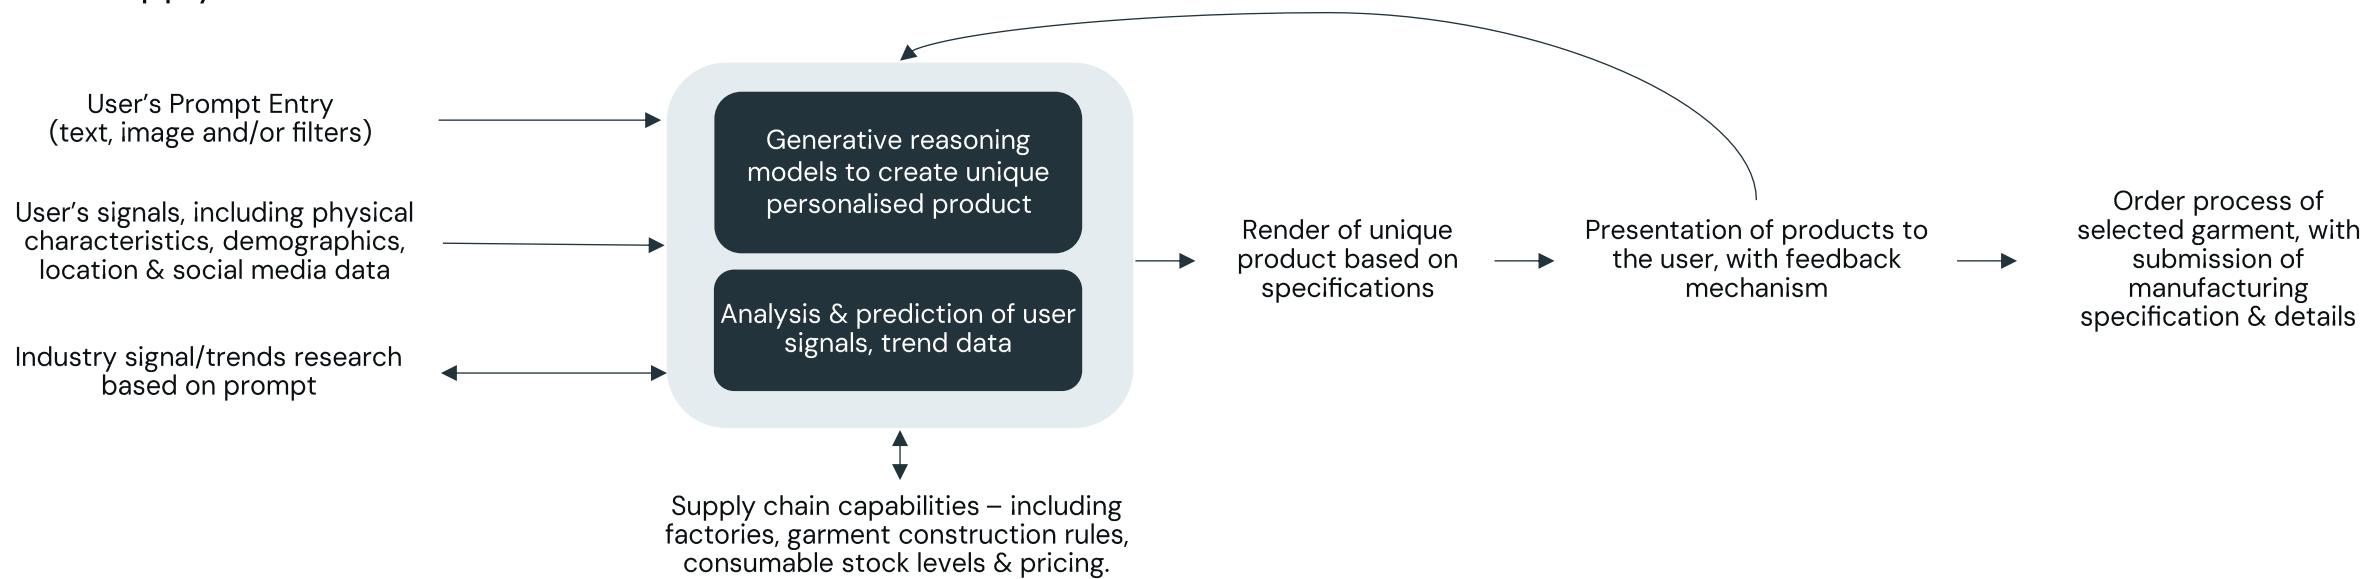

**Frictionless Reordering:** bridge gap between the physical garment and online presence

# SenseThread

## World's first personalised generative AI fashion design platform

Our Generative AI Fashion Designer Platform utilises our proprietary datasets (compiled fabric, design and manufacturing) and multiple AI models – so that from either a text or image prompt, and based on a consumers unique taste & preferences, a full detail technical specification of a garment is generated, along with a generated AI product photo and product descriptions, ready for manufacture on our supply chain

For a jacket garment type, the possible number of combinations based on our existing supply chain:

**65 billion consumable combinations**

Selection of fabric, lining, thread & buttons.

**X**

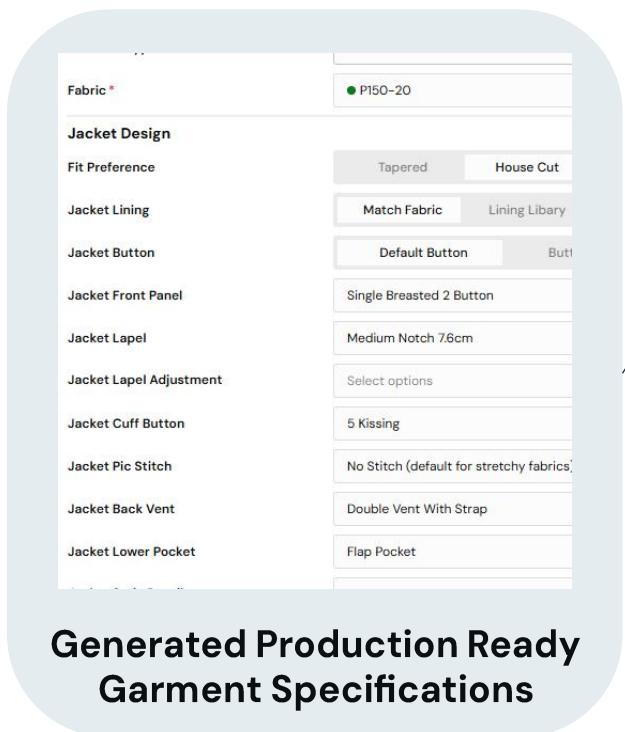

**16 quadrillion construction combinations**

Styles of lapels, collar, buttons, pockets, vents.

# SenseThread Example

## Platform Backend

The SenseThread AI platform can be made available in multiple contexts. This example shown is in the context of the backend platform for our THEODORE stylist team.

**AI Preview**

Fabric Swatch: P150-20

**Fabric Details: P150-20**

Fabric Code: P150-20  
Fabric Description: The fabric features a classic pinstripe pattern with alternating vertical stripes. The stripes are deep, rich red or emerald green. The stripes are a much paler, almost silvery gray, that contrasts sharply against the darker background. The fabric itself has a subtle texture and slight irregularity, suggesting it may be woven with a blend of fibers and isn't completely smooth. It gives the impression of being a medium-weight material with a matte finish.

Vest: \$100.0000  
Two piece: \$400.0000  
Three piece: \$600.0000  
Jacket: \$100.0000  
Trousers: \$140.0000  
Book: SUITS SPORT X  
Category: Suit  
Colour: GREEN  
Composition: 50%WV-45%CO 5%SE  
Pattern: STRIPE  
Yarn: -  
Weight: 230 gr  
Mill: Arantron  
Preferred: X

**Supported by an expansive team of technologists, stylists and business development.**

**Timothy Aquino**

Founder & Chief Executive Officer

With more than 15 years of experience in the menswear fashion industry, Timothy has made his mark in both Sydney and New York City. Combining deep understanding of the latest trends and styles with a talent for sales, he has consistently achieved outstanding results.

**Sean Fagan**

Co-Founder & Managing Director

In a career spanning 15+ years in director & executive roles, Sean brings a range of skills and a high capacity. His knowledge in web & app development, plus event & business expertise is invaluable. A member of the Australian Institute of Company Directors (MAICD), he possess a deep understanding of business leadership.

“

When it comes to fit, THEODORE has a very reliable system that can produce a custom-tailored experience through a few quickly snapped photos. The Sydney based tailoring brand promises to provide attentive customer care if needed, where they will literally do fine tuning until you have the exact suit that you want.

Harnessing the power of the modern smartphone, THEODORE is reinventing the tailoring experience, which is especially relevant considering the new landscape for the clothing industry post-pandemic.
